

## Installing PowerOffice 11 Client

Windows XP	The user <b>must</b> have Administration Rights
Windows Vista	The user must have Administration Rights and User Account Control switched off.
Windows 7	The user must have Administration Rights and the User Account Control slider set on it's lowest setting.

- When you insert the Inspired Interfaces CD it will automatically open the installer window.

- Before selecting ***Install***, choose the appropriate product you want to install.
- This document assumes that the IIPower database has been installed. (Refer to "Installing\_PO11\_MSSQL.pdf")
- **PowerOffice 11 (Client) ReticMaster 11 and ElecTech 11** are your user applications.
- Make sure the relevant check box is ticked - in this case, PowerOffice 11 Client. **Remove ticks for software you do not want to install.**
- Click ***Install***.
- Accept the suggested defaults during installation.

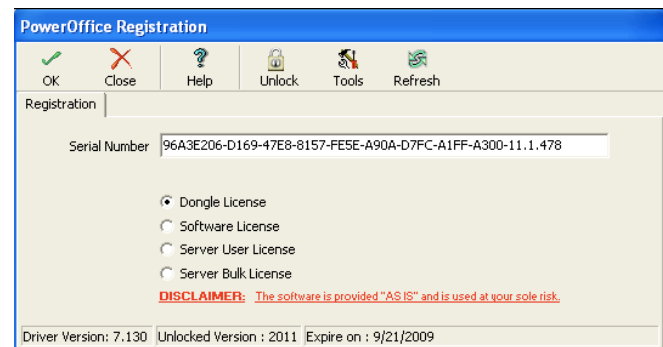

- Once the software is installed, go to Windows **Start\ All Programs, Inspired Interfaces, PowerOffice**. This opens the PowerOffice Login screen.

- Fill in the required info.
- For a first time installation:
  - Login Name: admin.
  - Password: Leave blank
  - Server name
    - If you have installed II PO 11 for MSSQL on the same machine this will be filled in automatically.
    - If connecting to another server fill in that server name.
  - Instance: IIPower
  - Database: IIPower11

- Click **I Agree** which will open PowerOffice11 requiring a first time unlock.

- Select the relevant license radio button for your license.
- Email the serial number to [info@interfaces.co.za](mailto:info@interfaces.co.za) for an unlock code.
- Once an unlock code is received, click **Unlock**, paste the unlock code in the space provided and then click **OK**.
- PowerOffice 11 will now be unlocked and ready to use.

**Please note that there is no data on the system at this point. Please refer to the document "First\_Time\_Data\_Import.pdf"**
